

APPEARANCE GRADE TECHNOLOGY

APPEARANCE GRADE EDGER OPTIMIZER

Just what the industry has been waiting for; a reliable, affordable, proven optimizer that senses knots and other defects and adjusts the edger solution to maximize the value of your wood. Baxley's long history of leadership in the optimization and scanning business, has added a significant new weapon to its arsenal – **the appearance grade optimizer.**

Primarily for softwood edgers, the appearance grade optimizer utilizes chroma+scan 3300 scan heads, coupled with grading algorithm software, to provide more value out the back of your machine. The scanners use high definition color cameras, plus integral laser dimensional measurements on 1/3" centers to achieve the best possible imaging of the board. One-inch, shop, or dimension; get a quote today to upgrade your mill. **The time is now.**
